

# Join the Stormtroopers!

FTC Robotics team #10276

Can you turn a wrench, write a program, or talk to your community? Then you'd be a perfect fit!

## About Us:

- Every year, we build robots to complete specific tasks, and then compete against other schools around Jacksonville.
- Last year, we were captain of the winning alliance at the district level.
- We do lots of work in the community, partnering with local businesses/organizations to grow the STEM knowledge base of Jacksonville.

Everyone has some skill they can lend to a FIRST team. Maybe you don't know about mechanics, but numbers are a second language to you. Maybe programming baffles you, but you're a social media whiz. No matter where your spark is, you can grow it in the FIRST community!
